This is my first latex document.

This is the second paragraph.

Protons and electrons have charges of equal magnitude, but opposite sign. The magnitude of these charges is known as the elementary charge and has a value of $e = 1.602 \times 10^{-19} \ C$

Protons and electrons have charges of equal magnitude, but opposite sign. The magnitude of these charges is known as the elementary charge and has a value of

$$e = 1.602 \times 10^{-19} \ C$$

Text mode $Math\ mode$

$$\frac{numerator}{denominator}$$

Equation **??** is the equation of a straight line.

$$y = mx + c \tag{1}$$
